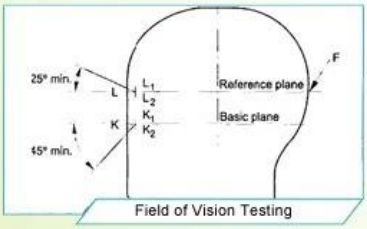
Test&Certifications

Even though we have considered every necessary elements to enhance the body structure in design, but we still use the professional equipments to inspect every aspects of our product! Our advanced in-house testing lab was built according to EN1078, EN397, EN12492, CPSC, etc. testing requirements. Before our mass production or send it to third-party testing organization, we check the quality ourselves & make sure they are qualified!

INNER HOUSE TESTING

"Testing Procedures"

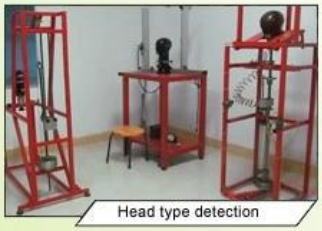
The Impact force detected



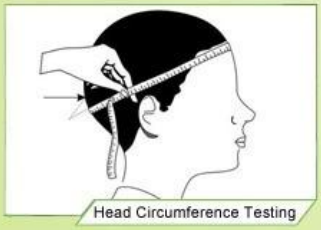
Field of Vision Testing

Every manufacturing steps at AURORA follows adhere to strict quality parameters and focus on quality throughout the each stagesinvolved. All raw material and semi finished goods at AURORA pass strict quality control.
The finished product, helmets at Aurora is then tested and qualified to export to the world.

Static Stability Testing



Head type detection



Head Circumference Testing

Conditioning Tests

Shock Absorbing Capacity

dynamic strength test

CERTIFICATE

Our strong advantages that other factories cannot compare with:

All the materials we use are all raw materials with high quality, which are all imported from British,Germany and Austria. All can pass through European SVHC as well as the United States' CA65 chemical requirements, and can reach non-toxic, 7 p environmental protection requirements.

If the material of EPS foam is used material or renovation material, then the strength of EPS to absorb impact will be greatly weakened, thus it might not hold an effect to protect head.
