Manufacturing Processes

- Casting
- Machining
- Forming
- Joining
- Powder Metallurgy
- Additive Manufacturing

Materials

- Metals
- Polymers
- Composites
- Ceramics
- CNC
- Alloys
- Surface Treatments
- Coatings

Quality Control

Quality control is essential for ensuring that manufactured parts meet the required specifications and standards. OEMs often implement rigorous quality control processes to maintain consistency and reliability.

- Statistical Process Control (SPC)
- Inspection and Testing
- Root Cause Analysis (RCA)
- Six Sigma
- ISO 9001
- OEM Quality Standards

Supply Chain Management

- Procurement
- Inventory Management
- Logistics
- Supplier Selection
- Risk Management

Product Design

- CAD (Computer-Aided Design)
- PDM (Product Data Management)
- Simulation
- Prototyping
- 3D Printing & Additive Manufacturing

Customer Service

Customer service is a critical component of manufacturing, ensuring that customers are satisfied with their purchases and that any issues are resolved promptly. OEMs often provide technical support and training to their customers.

QUALITY

With strict quality management system and first-class products

OEM&ODM

We can provide OEM and ODM service for customers

R&D TEAM

With professional and strong technical development team

PRICE

We have our own production line, to reduce the price to a minimum

PATENT

We constantly introduce patented technology products

SERVICE

Perfect after-sales service, so customer satisfaction
