An Oval shaped helmet is designed for a rider's head with a dimension which is considerably fit for Europeans.

Generic headform

A generic headform helmet is designed for a rider's head with a dimension which is slightly longer front-to-back than its side-to-side measurement.

Asian headform

A Round shaped helmet is designed for a rider's head with a dimension which is considerably fit for Asians.

ANSWER

ANSWER: The helmet shape that best fits the rider's head is the Asian headform. The Asian headform is round, which fits the rider's head better than the European or Generic headforms. The Asian headform is also more comfortable and provides better protection for the rider's head.
