Manufacturing Processes

- Casting
- Machining
- Forming
- Joining
- Powder Metallurgy
- Additive Manufacturing

MANUFACTURING

- Process Selection
- Design for Manufacturing
- Material Selection
- CNC Machining
- Injection Molding
- Die Casting

Product Development

Product development is a multi-stage process that begins with market research and ends with mass production. It involves the creation of a new product or the improvement of an existing one. OEM (Original Equipment Manufacturer) is a key player in this process, providing specialized manufacturing services.

- Concept Development
- R&D (Research & Development)
- Prototyping
- Testing & Validation
- Production Ramp-up

Quality Control

- Inspection
- Statistical Process Control (SPC)
- Six Sigma
- ISO 9001
- Supplier Quality Management

Supply Chain Management

- Procurement
- Inventory Management
- Logistics
- Supplier Selection
- 3D Printing & Additive Manufacturing

Industry Trends

The manufacturing industry is undergoing a significant transformation due to technological advancements. Key trends include automation, digital manufacturing, and the integration of Industry 4.0. These changes are driving efficiency, reducing costs, and enabling the production of more customized products.

QUALITY

With strict quality management system and first-class products

OEM&ODM

We can provide OEM and ODM service for customers

R&D TEAM

With professional and strong technical development team

PRICE

We have our own production line, to reduce the price to a minimum

PATENT

We constantly introduce patented technology products

SERVICE

Perfect after-sales service, so customer satisfaction

Our OEM products are strictly confidential and we accept NDA. We can provide OEM and ODM service for customers. We have our own production line, to reduce the price to a minimum. We constantly introduce patented technology products. Perfect after-sales service, so customer satisfaction.
