HIGH DENSITY EPS FOAM

Impact-absorbing material, offering great protection on our head.

SOFT WASHABLE PADS

Ergonomic interior padding for comfort and durability

NYLON STRAP & CHIN STRAP

Designed to limit risk of losing helmet during a fall, side strap-adjustment to assist with a proper fit.

Helmet Shape 101

European Headform

A long Oval shaped helmet is designed for a rider's head with a dimension which is considerably longer front-to-back than its side-to-side measurement.

Intermediate Oval

An intermediate Oval shaped helmet is designed for a rider's head with a dimension which is slightly longer front-to-back than its side-to-side measurement.

Asian head form

A Round Oval shaped helmet is designed for a rider's head with a dimension which has an equally long front-to-back measurement as side-to-side measurement.

Introduction

Overview

This document provides a comprehensive overview of helmet shapes and their corresponding head forms. It details the characteristics of three primary helmet shapes: European, Intermediate Oval, and Asian. The goal is to help riders understand how to select a helmet that best fits their head shape for maximum safety and comfort.

European Headform

The European headform is characterized by a long, narrow oval shape. Helmets designed for this headform have a longer front-to-back measurement compared to their side-to-side measurement. This design provides a snug fit for riders with elongated skulls.

Intermediate Oval

The intermediate oval headform is a balanced shape, neither as elongated as the European or as round as the Asian. Helmets for this shape have a front-to-back measurement that is only slightly longer than the side-to-side measurement, offering a more universal fit.

Asian Headform

The Asian headform is more rounded, with a front-to-back measurement that is nearly equal to the side-to-side measurement. Helmets designed for this shape have a more circular profile to accommodate the wider skull shape.

Conclusion

Understanding your head shape is the first step in choosing the right helmet. Consulting a professional fitter can ensure you get the best possible fit for your specific head form.

FAQ

Q: How do I determine my head shape?
A: A professional helmet fitter can measure your head's front-to-back and side-to-side dimensions to determine your head form. Online resources and mirror self-checks can also provide some insight.
