Helmet Shape 101

Introduction

Understanding helmet shapes is crucial for ensuring a proper fit and safety for riders.

Key factors include head shape and helmet design.

A helmet that fits well provides better protection and comfort during a ride.

Common helmet shapes include:

European, Generic, and Asian. Each shape is designed to accommodate different head dimensions.

Helmet Shape 101

European Headform	Generic headform	Asian headform
An Oval shaped helmet is designed for a rider's head with a dimension which is considerably fit for Europeans.	A generic headform helmet is designed for a rider's head with a dimension which is slightly longer front-to-back than its side-to-side measurement.	A Round shaped helmet is designed for a rider's head with a dimension which is considerably fit for Asians.

Conclusion

Choosing the right helmet shape is essential for safety and comfort. Riders should consider their head shape and consult with experts or retailers for the best fit. Proper fit ensures maximum protection and a more enjoyable riding experience.
