### 1. OEM

OEM: OEM is a type of production where a manufacturer produces goods or services on behalf of another company. This is often used for products that require specialized equipment or expertise. OEM products are typically sold in bulk and are often used in industrial or commercial settings. OEM products are often sold at a lower price than retail products because they are produced in large quantities and are often sold directly to the end user.

### 2. ODM

ODM: ODM is a type of production where a manufacturer produces goods or services on behalf of another company, but the manufacturer also designs and develops the product. This is often used for products that require specialized equipment or expertise. ODM products are typically sold in bulk and are often used in industrial or commercial settings. ODM products are often sold at a lower price than retail products because they are produced in large quantities and are often sold directly to the end user.
