Helmet Shape 101

The image displays three wireframe head models, each overlaid with a red dashed line representing a different helmet shape. The first model on the left is elongated horizontally, representing an oval shape. The middle model is more spherical, representing a generic shape. The third model on the right is rounded, representing an Asian shape.

European Headform	Generic headform	Asian headform
An Oval shaped helmet is designed for a rider's head with a dimension which is considerably fit for Europeans.	A generic headform helmet is designed for a rider's head with a dimension which is slightly longer front-to-back than its side-to-side measurement.	A Round shaped helmet is designed for a rider's head with a dimension which is considerably fit for Asians.
