# Helmet Shape 101

### European Headform

An Oval shaped helmet is designed for a rider's head with a dimension which is considerably fit for Europeans.

### Generic headform

A generic headform helmet is designed for a rider's head with a dimension which is slightly longer front-to-back than its side-to-side measurement.

### Asian headform

A Round shaped helmet is designed for a rider's head with a dimension which is considerably fit for Asians.

## Headform: Headform:

Headform is a model of a human head used for testing helmets. It is used to determine the fit and safety of helmets. There are three main types of headforms: European, Generic, and Asian. Each type is designed to fit a specific population. The European headform is oval-shaped, the Generic headform is slightly longer front-to-back, and the Asian headform is round-shaped. It is important to choose a helmet that fits your headform properly for maximum protection.
