The Dial of Adjustment can be interchangeable with LED light

How to adjust the helmet dial:

Step 1:

Turn the dial clockwise to tighten the helmet. Turn counter-clockwise to loosen it.

Step 2:

Adjust the dial until the helmet feels snug and secure. Do not over-tighten.

Step 3:

Check the fit by shaking your head. The helmet should move with you, not independently.

Helmet Shape 101

European Headform

An Oval shaped helmet is designed for a rider's head with a dimension which is considerably fit for Europeans.

Generic headform

A generic headform helmet is designed for a rider's head with a dimension which is slightly longer front-to-back than its side-to-side measurement.

Asian headform

A Round shaped helmet is designed for a rider's head with a dimension which is considerably fit for Asians.

How to choose a helmet shape:

Consider your head shape and the helmet's internal padding. A good fit is essential for safety. [amenable](#) helmet fit
