The Dial of Adjustment can be interchangeable with LED light

How to adjust the helmet dial:

Step 1:

Turn the dial clockwise to tighten the helmet. Turn it counter-clockwise to loosen it. Do not turn it too far.

Step 2:

Check the fit. The helmet should sit snugly on your head. If it feels loose, turn the dial clockwise. If it feels too tight, turn it counter-clockwise.

Step 3:

Repeat the process until the helmet fits perfectly. Do not over-tighten.

Helmet Shape 101

European Headform

An Oval shaped helmet is designed for a rider's head with a dimension which is considerably fit for Europeans.

Generic headform

A generic headform helmet is designed for a rider's head with a dimension which is slightly longer front-to-back than its side-to-side measurement.

Asian headform

A Round shaped helmet is designed for a rider's head with a dimension which is considerably fit for Asians.

How to choose a helmet:

First, determine your head shape. If you have an oval head, choose an oval helmet. If you have a round head, choose a round helmet. If you have a generic head, choose a generic helmet. **amenable** to your head shape.
