Helmet Shape 101

European Headform

An Oval shaped helmet is designed for a rider's head with a dimension which is considerably fit for Europeans.

Generic headform

A generic headform helmet is designed for a rider's head with a dimension which is slightly longer front-to-back than its side-to-side measurement.

Asian headform

A Round shaped helmet is designed for a rider's head with a dimension which is considerably fit for Asians.

How to choose:

When choosing a helmet, it's important to consider your head shape. If you have an oval head shape, an oval helmet is the best fit. If you have a generic head shape, a generic helmet is the best fit. If you have a round head shape, a round helmet is the best fit. It's also important to consider the helmet's safety features, such as the chin strap and the padding. A good helmet should fit snugly and comfortably, and it should provide adequate protection in the event of a crash. Remember, a helmet is your best friend on the road, so choose wisely!
