Helmet Shape 101

European Headform

An Oval shaped helmet is designed for a rider's head with a dimension which is considerably fit for Europeans.

Generic headform

A generic headform helmet is designed for a rider's head with a dimension which is slightly longer front-to-back than its side-to-side measurement.

Asian headform

A Round shaped helmet is designed for a rider's head with a dimension which is considerably fit for Asians.

Helmet Size

Helmet size is determined by the circumference of your head. To measure your head, use a soft measuring tape and wrap it around your head, just above your eyebrows and ears. Make sure the tape is level and snug, but not too tight. The number on the tape is your head circumference in centimeters. Most helmets are sized in centimeters, ranging from 54 to 62. If you are unsure of your size, it's best to consult a professional fitter or a helmet retailer. Remember, a proper fit is crucial for safety.
