

如何選擇 EVA 泡棉 3D 打印

EVA 泡棉，具有優良的彈性和緩衝性能，是 3D 打印的理想材料。其優點包括：重量輕、易於加工、耐用且具有良好的吸震效果。EVA 泡棉 3D 打印的應用非常廣泛，包括：

1. 緩衝包裝材料
2. 運動器材
3. 醫療設備
4. 汽車零件
5. 建築模型

3D Earplugs :

3D Earplugs are 'Removable' and anallergic, made of soft foam. They are suitable for use in noisy environments & A-weighted noise levels up to 115 dB(A). They are also acceptable for use in the workplace.

These earplugs are made of soft foam and are suitable for use in noisy environments. They are also acceptable for use in the workplace.

3D Earplugs :

These earplugs are made of soft foam and are suitable for use in noisy environments. They are also acceptable for use in the workplace.

3D Earplugs :

These earplugs are made of soft foam and are suitable for use in noisy environments. They are also acceptable for use in the workplace.
