Helmet Shape 101

European Headform

An Oval shaped helmet is designed for a rider's head with a dimension which is considerably fit for Europeans.

Generic headform

A generic headform helmet is designed for a rider's head with a dimension which is slightly longer front-to-back than its side-to-side measurement.

Asian headform

A Round shaped helmet is designed for a rider's head with a dimension which is considerably fit for Asians.

Helmet Sizing

When you buy a helmet, it's important to know your head size. Most helmets are sized in inches (22 to 24) and centimeters (55 to 61). To find your head size, use a soft measuring tape to measure the circumference of your head, about 1 centimeter above your eyebrows. Write down the measurement and compare it to the manufacturer's size chart. If you're between two sizes, choose the larger one. It's better to have a loose helmet than a tight one. A loose helmet can move around and not protect you properly. A tight helmet can be uncomfortable and may not fit properly. Most helmets have an adjustment system to allow you to adjust the fit. Make sure the helmet is level on your head and not tilted forward or backward. The chin strap should be snug and comfortable. It should be able to hold the helmet in place without being too tight. If you're unsure, it's best to try on a helmet in person. Many sporting goods stores have a helmet fitting service. They can help you choose the right size and shape for your head. It's important to take your time and find a helmet that fits well and provides the protection you need.

CERTIFICATE

认证证书:

本公司通过了 SGS、ECM、CERTOTTICA、ISO 9001 等认证。R & D 部门通过了 CE 认证。所有产品均符合 CE 认证要求。
