Production process

Notes

The production process of bicycle helmets involves several steps, from design to shipping. The process starts with design and prototyping, followed by injection molding of the helmet shells. The shells are then finished and assembled into complete helmets. The final step is packaging and shipping the helmets to the customer. The production process is a continuous cycle that involves multiple stages of production and distribution.

□□ □□

Our products are widely used in various fields.

Our products, including helmets, are widely used in various fields. OEM and ODM services are available. Our R & D team has a strong background in helmet design and production. 100% of our products are made in China. We have a professional team to provide the best service during your purchase. Our products are widely used in various fields.

AURORA SPORTS LIMITED

Company information

Facilities

We have professional facilities to produce different kinds of helmet to meet your different demands. OEM and ODM are also welcomed.

Production line

Every step of our production are strictly control to achieve the high quality of the helmet.

Professional team

We have a professional team to provided the best servise during your purchase.
