# Helmet Shape 101

### European Headform

A long Oval shaped helmet is designed for a rider's head with a dimension which is considerably longer front-to-back than its side-to-side measurement.

### Intermediate Oval

An intermediate Oval shaped helmet is designed for a rider's head with a dimension which is slightly longer front-to-back than its side-to-side measurement.

### Asian head form

A Round Oval shaped helmet is designed for a rider's head with a dimension which has an equally long front-to-back measurement as side-to-side measurement.

## Components of europe style bicycle helmet

### Liner:

Most helmet liners are made of expanded polystyrene foam. On impact, the liner dissipates the force of the impact to protect your head. Make sure the liner fits your head comfortably and that it's not damaged or dented.

### Shell:

Most cycling helmets are covered with a plastic shell to hold the helmet together in a crash, provide puncture-resistance and allow the helmet to slide on impact (to protect your head and neck). Make sure the shell is intact and in good shape.

### **Ventilation:**

Helmet vents enhance wind-flow over your head, keeping you cooler and more comfortable as you ride. In general, the more vents you have, the cooler you'll be.

### **Straps:**

Find a helmet strap system that's comfortable and easy to get in and out of. Also make sure that it matches your riding style — beefy for rough terrain and mountain trails, lighter and cooler for road racing. Try a couple of different systems before you decide on one.

### **Hair port:**

This helmets come with a strap design that accommodates ponytails

## **Adjust the Fit**

The Fit:

Below we shows how to adjust the fit :

Step 1:Make sure you Ware it in the proper position ,the brim of helmet should be paralle with your eyebrow

Step 2.Adjust the divider to make sure the strap lock your ear very well

Step 3.Adjusting the chin strap till you feel compact

Step 4.Adjust the headlock make sure the helmet cover your head very well
