## Components of a Helmet

### Liner:

Most helmet liners are made of expanded polystyrene foam. On impact, the liner dissipates the force of the impact to protect your head. Make sure the liner fits your head comfortably and that it's not damaged or dented.

### Shell:

Most cycling helmets are covered with a plastic shell to hold the helmet together in a crash, provide puncture-resistance and allow the helmet to slide on impact (to protect your head and neck). Make sure the shell is intact and in good shape.

### Ventilation:

Helmet vents enhance wind-flow over your head, keeping you cooler and more comfortable as you ride. In general, the more vents you have, the cooler you'll be.

### Straps:

Find a helmet strap system that's comfortable and easy to get in and out of. Also make sure that it matches your riding style — beefy for rough terrain and mountain trails, lighter and cooler for road

racing. Try a couple of different systems before you decide on one.

**Hair port:**

This helmets come with a strap design that accommodates ponytails.

**Why choose aurora?**

1. Real factory with machines and skilled workers.
2. Experienced staffs in foreign trade
3. We can accept small order ODM and OEM order
4. High level quality, with CE/EN1078 certification
5. Competitive price and fast delivery, all shipping method are accepted
6. Vary payment term method, LC TT Western Union or Paypal, please contact us ASAP
7. It is our will to grow bigger with our customers together

**INNER HOUSE TESTING**

**“Testing Procedures”**

Every manufacturing steps at AURORA follows adhere to strict quality parameters and focus on quality throughout the each stages involved. All raw material and semi finished goods at AURORA pass strict quality control. The finished product, helmets at Aurora is then tested and qualified to export to the world.
